

I open an account at Lifewishes

I choose

```
graph TD; A[I choose] --> B[Persons of Trust]; A --> C[Persons of Heart];
```

Persons of Trust

Notary, doctor, therapist,...

Persons of Heart

friends, family, relatives,...

They will all receive an email to explain how Lifewishes works and to warn them that they are designated as persons of trust and / or persons of heart.

When I die, anyone can request access to my account.

```
graph TD; A[When I die, anyone can request access to my account.] --> B[If I have an account]; A --> C[If I don't have an account];
```

If I have an account

Lifewishes sends all the persons of trust a confirmation code to unlock the account that confirms my death.

If I don't have an account

The applicants receive an email to say that there is no account with this name.

Upon receipt of the validation code by one of the persons of trust, the account is unlocked, and access is sent to people of heart for the writings.

Targeted people receive their personalised messages

Lifewishes keeps the contents of the account for one month after opening of the account. It is accessible only to people of heart and is destroyed after the deadline.
